LEGAL DISCLAIMER

It is required that you read this legal disclaimer section carefully. If you have any doubts, get advice from legal, financial, taxation, or other competent law practitioners. All of the information provided here is not intended to be complete, and it should never be construed as a part of different contractual arrangements.

It is our firm conviction that the information provided in this white paper is accurate and up to date and that all products, services, technical architecture, token distribution, and company timelines are accurate and up to date. Furthermore, all of these materials may have changed without notice, and they can never be considered a signatory agreement of advice.

No Advice:

This white paper does not obligate anybody to sign a contract or make a legally enforceable commitment to contribute. This white paper also does not constitute any form or part of any opinion that can be construed as advice, or that can be used to sell or solicit any offer by Trillions to purchase our token, nor shall it be construed as a part of any effect that can be used in the formation of a contract or an investment decision.

Compliance with tax obligations:

Users of the Website are entirely responsible for determining what, if any, taxes, if any, apply to their transactions. The Website's owners or authors are not responsible for determining which taxes apply to transactions.

Limitation of liability

LUMOS Token shall not be held liable for any loss or harm resulting from the use of this website's material, including written material, links to third-party sites, data, quotations, charts, and buy/sell signals. Please be fully informed about the dangers and expenses of trading assets on the financial markets (digital or otherwise). ICOs, in particular, are one of the riskiest investing options. There's a chance you'll lose your whole investment.

Investment risks

Trading cryptocurrencies have a high level of risk and is not suited for all investors. You should carefully evaluate your investing goals, level of expertise, and risk appetite before opting to trade cryptocurrencies, tokens, or any other digital asset.

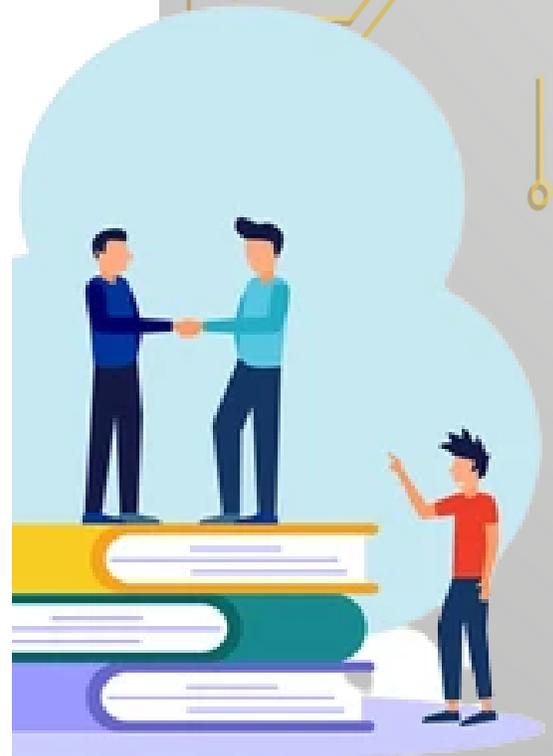

Introduction

This white paper is a reader-friendly description of a decentralized BEP-20 smart contract-based cryptocurrency. As we all know that the popularity of digital currency has allowed a new economy to flourish parallel to the existing traditional money tied to centralized banks we are creating an ecosystem that provides interest to their token holders as well as it will provide an opportunity for Everyone to flourish their ideas.

The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered. The aim of LTEX Token is to provide security, Transparency, High limits cash deposit and withdrawal, and better odds. In short, LTEX Token is a solution base ecosystem in a single form.

LTEX Token provides a bridge which is an advanced decentralized exchange built for swapping BEP-20 and ERC-20 tokens-based token LTEX Token bridge is a Unique Decentralized Exchange where users can switch to a Binance chain from ethereum and vice versa.

Mission

Our mission is to "LTEX Token to New Heights" by offering an innovative, user-friendly, one-stop-shop to find everything they need, to give every person in the world an equal chance to manage and improve their financial security. Our focus is to connect the digital currency LTEX Token through our ecosystem as the popularity of digital currency has allowed a new economy to flourish parallel to the existing traditional money tied to centralized banks.

Our Mission is to

- Provide every Holder with simple and effective ways to gain exposure to digital assets.
- Lower the barrier for entry to a more advanced financial ecosystem.
- Operate as a community-focused and community-driven digital asset, fully decentralized in every sense of the word.
- Our mission is to provide support to investors so they can flourish and get benefited from the decentralized blockchain ecosystem.
- LTEX Token creates a bridge between BEP-20 and ERC-20 platforms where users can switch to a Binance chain from ethereum and vice versa.

Vision

We aspire to put "cryptocurrency in every portfolio." We envision a world where wealth-building strategies that were once only accessible to affluent individuals become available to everyone, transferring the power over our financial systems back to the people. LTEX Token is going to create a revolutionary ecosystem to bring more people into digital assets, helping to earn a passive income through redistribution/reflection, by stake the LTEX Token along-term, along with maintaining their privacy, security, power, and autonomy. We strive to create an ecosystem based on sound monetary policies, with a sound and solid decentralized foundation, that should be expected with the LTEX Token digital asset.

Staking

LTEX Token works on the Binance platform, which is eco-friendly, working on a proof of stake. In addition to being the largest crypto exchange by trading volume, Binance offers exemplary staking services. Binance staking ensures users' funds are safe by leveraging effective security measures and providing Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and eco-friendliest methods (for cryptocurrency) to earn passive income. The platform stores all staked coins using a secure wallet and a double-checking system.

LTEX Token staking is quickly becoming a practice of gaining passive income by merely storing or locking funds in a wallet as more individuals, including institutional investors understand the crypto market's lucrativeness. Since staking cryptocurrencies necessitates certain technological crypto know-how and compliance criteria, LTEX Token staking platforms are useful for allowing investors, including those lacking technical knowledge of cryptocurrencies, to stake proof of stake (PoS) coins and receive rewards. The staking network lends you their professional skills and authenticates stakes on your behalf for a small percentage of your staking prizes, allowing you to receive submissive profits. Staking platforms that enable investors to collect staking incentives have sprung up in response to the rapid growth in crypto staking. If you're interested in earning a passive income by staking and love supporting charities, this is the place to be.

Benefits of Staking

Staking is advantageous in cryptocurrency as it generates rewards by holding the coin on any exchange and generating passive income. When an investor holds a coin and staking the pool, it is the easiest method to do, in a decentralized world. There is very sufficient energy consumption and stumpy probabilities of risks while staking than any crypto mining LTEX Token is here for you.

There are a few quantifiable benefits of Staking coin with Beast NFT

NO HARDWARE IS REQUIRED

Unlike proof of work, there is no need of a specific equipment or hardware for crypto staking. Proof of stake works with no equipment requirements. The only requirement is to hold the coin for an interval of time by the holders on any exchange

PASSIVE INCOME

Stake holders earn incentives by holding and controlling their digital wealth. Passive income for the beneficiary is the reward of staking.

SCALABILITY

In the Blockchain world, scalability is a concept that is often used. It refers to a computational process's potential to be used or generated in a variability of ways. Proof of stake protocols, as shown by Anime Cash's higher transaction outputs and lower fees, make for greater scalability.

ECO-FRIENDLIER

As Proof of stake blockchains are less energy-consumers, they are more environment friendly. Thus, they have a lower carbon footprint and have little or no environmental effects.

MORE COST-EFFECTIVE

Proof of stake blockchains are always inexpensive and less energy-consuming platforms with no particular and expensive hardware requirements. Unlike proof of work chains, PoS is more cost-effective and eco-friendly. So, the stakers can earn more passive income by using anime cash.

HIGHLY SECURED WITH THE HELP OF ANIME CONTRACT

The biggest issue in the modern world is security and privacy, and anime cash provides a swift and stable portal that is backed by the Anime contract, making him superior to others. Anime contract is offering a highly secure and fast platform to the users for staking crypto.

LTEX Wallet

The LTEX Token wallet version is supported on both Android and iOS. The wallet is highly focused on enabling users to manage their coins and interact with the ecosystem. The private keys for the wallet are stored on the user's device and are secured through Secure Enclave and biometric authentication technology.

Users can complete all the normal functions that a wallet provides. They can monitor their balance as well as send and receive coins. Users can also exchange on through the LTEX Token wallet and use and swap their coins. The wallet enables users to access decentralized exchanges so that they can easily convert between their coins. LTEX Token Wallet is fast, secure, and will have a low transaction fee than others, and users can donate and vote for the organization by using our wallet. A user can hold and swap by using the LTEX Token Wallet.

Here are some of the important features of Wallet:

- Easy to use. It's just like any other software or wallet that you use for your day-to-day transactions.
- Highly secure. It is just a matter of securing your private key.
- Allows instant transactions across geographies. And these are barrier-free, without intermediaries.
- Low transaction fees. The cost of transferring funds is much lower than with traditional banks.
- Allows transactions across multiple cryptocurrencies. This helps you do easy currency conversions.

APP/Wallet Key Features

- Dashboard with Deposit and Withdraw Charts
- Fully responsive and dynamic design
- Dashboard History chart
- Real time charts
- Deposit
- Withdrawals
- Wallet Activity transaction
- Buy token with debit and credit card
- Generate wallet address
- User can send coin to both internal and external address
- User profile
- Referral List, Referral Link,
- Secured withdrawal using queue
- All files are well commented
- Well Documentation
- Free Updates
- Customer support
- Withdraw your fiat directly into your bank account.
- Browser

LTEX Swapping

With LTEX Token swap, you can exchange crypto in your Private Key Wallet or your Trading Account. Swapping from your Private Key Wallet provides you with the benefits of a non-custodial, on-chain trade settlement. Swapping from your Trading Account provides faster settlement and no network fees.

There are many great reasons our Wallet users love using Swap:

- Quickly swap into an asset you believe will grow
- Move out of a volatile asset into one of our stable coins
- Hedge against real-world events.

LTEX Token is integrated into the top cryptocurrency trading exchanges in the world, this allows users to search and select the best rates for the transaction. An additional benefit is that some crypto swap services do not require users to create an account

LTEX Bridge

LTEX Token bridge is an advanced decentralized exchange built for swapping BEP-20 and ERC-20 tokens, based tokens. LTEX Token bridge is a Unique Decentralized Exchange where users can switch to a Binance chain from ethereum and vice versa, for swapping any coin supported by Binance Bep-20 and ethereum ERC-20. LTEX Token bridge is the unique platform that is operating in the cross-chain blockchain without the involvement of 3rd party.

Cross-chain solutions are increasingly catching the attention of speculators within the decentralized finance ecosystem. As products and platforms grow in popularity, interoperability between separate chains is becoming increasingly important.

The space is evolving very rapidly, and the lack of cross-chain interoperability platforms has been one of its biggest hurdles to grow. There have been diverse challenges within the Defi and the LTEX Token bridge is committed to solving a few of them.

Why Static?

The reflected method successfully enables coin holders to hold their coins depending on percentages completed and total coins owned by owners. Static rewards play an important part in addressing a variety of issues in order to provide investors with earnings depending on the number of coins exchanged in the market. This method is designed to satisfy early adopters who want to sell their coins after earning high APYs.

This method attempts to relieve some of the negative sell pressure on the coins that have been created by early adopters selling their coins after harvesting insanely high APYs. Second, the reflecting mechanism encourages holders to keep their coins in order to earn greater kickbacks, which are calculated as a proportion of the total coins owned by the owner.

Burning

Sometimes burns are important, and sometimes they aren't. In the early days, a continuous burn on a single protocol may be convenient, but it implies the burn cannot be limited or regulated in any manner. Burns that are managed by the team and elevated based on accomplishments assist to keep the community informed and rewarded.

The conditions and proportions of the automatic burn may be marketed and monitored. LTEX Token intends to execute a long-term burn strategy that is both helpful and gratifying for people who participate. Furthermore, manual burns assist in rewarding and informing the community. The manual burn's circumstances and quantities are publicized and monitored. The burning of squid coin will continue after every transaction. burnt is shown on our website readout, allowing for more transparency in determining the current circulating supply at any one moment.

In LTEX Token the total burn is 6.5% of each transaction which is 4.5% will be re-distributed to holders for exchange and for bridging between BEP-20 and ERC-20.

How to buy?

To buy LTEX Token, Buyers will need a "wallet," which is an internet application that stores buyers' or holders' funds. In general, holders open an account on an LTEX trust wallet and may use pancakeswap and then use real money to purchase tokens both BEP-20.

- Sign in to Coinbase.
- Select Buy / Sell on the upper right-hand side.
- Click the Buy field to select the asset you'd like to purchase.
- Use the trust wallet or pancakeswap.
- Enter the amount you'd like to buy denominated in a crypto or your local currency.
- Select your payment method.

LTEX Token have some unique qualities such as swapping, staking, burning, exchange, and bridging. LTEX Token Bridge is a one-of-a-kind decentralised exchange where users may swap any currency supported by Binance Bep-20 for any coin supported by Binance Bep-20.

Buy LTEX Token and join our community

LTEX Token is currently available on Pancakeswap and can be purchased using our contract address.

0xBcB3ac7a3ceB2d0C5E162A03901d6D7bb8602912

you can follow the steps below if you are new on pancakeswap or buy directly through our trust wallet.

- **Metamask:**
register on BEP-20 account on metamask or coinbase

- **Pancakeswap:**
Go to the pancakeswap and add our token contract address above

- **Connect a wallet:**
Connect a Metamask or coinbase BSC wallet to pancakeswap

- **Transfer BSC to your metamask:**
Buy BSC and transfer to your metamask or coinbase wallet

- **Slippage Tolerance:**
Make sure you set the Slippage tolerance between 5% and 10%

- **Swap:**
Swap your BSC for your new shiny LTEX Token, hold it in your wallet and watch your value increase.

Why LTEX Token?

Transparency & Immutability

With LTEX Token, each time exchange of tokens is recorded on the multi-blockchain, an audit trail is present to trace where the tokens came from. This helps improve security and prevent fraud in exchange-related businesses and also helps verify the authenticity of the traded assets.

Lower Fees

The fees associated with LTEX Token transactions are far less than those associated with debit, credit cards as well as wire transfers, and BACS payments.

Transaction traceability

LTEX Token is far more secure than other record-keeping systems because each new transaction is encrypted and linked to the previous transaction. LTEX Token is formed by a complicated string of mathematical numbers and is impossible to be altered. This immutable and incorruptible nature of LTEX Token makes it safe from falsified information and hacks once formed.

Easy to use

Ease of use is the reason why LTEX Token has no value. All you need is a smart device, an internet connection and instantly you are able to manage your own payments and money transfers.

Why LTEX Token?

Open for global participants

LTEX Token facilitates the transaction and brings them closer to a wider audience. An added benefit of LTEX Token use is that it's completely decentralized, so trading can be done freely across borders. The use of technology will facilitate a financial revolution that will leave everyone more financially connected, empowered, and enabled. LTEX Token has no border so can be used no matter where you are located globally. This also has a huge effect on international payment fees. Traditionally international transfers have much higher fees than domestic transfers and payments. International payments and transfers with crypto are the same as domestic.

Free from corporate and government interference

LTEX Token transactions have no intermediary institutions or government involvement, the cost of transactions is kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization and waiting period requirements.

The efficiency of payment transactions

Standard transfers and foreign purchases typically involve fees and exchange costs. Since LTEX Token transactions have no intermediary institutions or government involvement, the costs of transactions are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorisation requirements and wait periods.

Ethereum Blockchain compliant

LTEX Token has Eth blockchain-compliant tokens, which means that it supports a few functions that all Eth blockchain tokens support.

ROADMAP

Q3 2021

- Lite Paper (White Paper Summarise)
- Token Development
- Official merchant Website Launch
- Community Representative Program
- BSC Scan Contract Verification
- 6000 holders
- Founding Team meeting
- White Paper Public Release

- Ideation
- Token Fair Launch
- 1000 holders
- Official Logo Creation
- Official Logo Release
- Growing Social Media Pages
- Official Website Development
- Contract audit

Q 01 2022

Q4 2021

- Press Release
- 40000 holders
- Coinmarketcap & Coingecko
- Initial Partnership with Brands Signed
- Community T-Shirt Design Competition
- More Competition
- Reach 5K holders

- More marketing plan,
- Reaching 15K holders
- Listing on samall exchange
- Donation planning

Q 02 2022

Q 03 2022

- Big marketing
- Reaching 40K-50K holders
- Listing on top 10 exchange
- Donations for medical treatment
- Donations for cancer, kids and homeless folks

Please note that the road map will be updated in future for any new project or updates
